

We are...solutions for specialty risks. ASI was one of the pioneers in the environmental insurance industry and today, we boast more than 25 continuous years of providing environmental insurance coverages. Our experience and underwriting expertise is one of the main reasons that some of our insureds have been with us since the beginning! The benefit of doing business with ASI is that we have some of the most knowledgeable underwriters in the industry, offer loss control programs and claims management services.

Program Specifics

In 2001, American Safety Insurance introduced its Internet-based ProStar Online™ electronic submission, rating and quoting system which features real time submission clearance and bindable new and renewal quoting capabilities, accessible from any computer.

Through the system, approved producers can access a variety of coverages for environmental consultants and contractors, as well as pollution liability for non-environmental contractors.

ASI offers commercial general liability and contractor's pollution liability for environmental contractors, commercial general liability and professional liability for environmental consultants, monoline professional liability for environmental consultants and monoline contractor's pollution liability for non-environmental contractors. All coverages are on ASI's ISO-based EnviroStar™ form through one of three "A" rated carriers.

Limits up to \$11 million per occurrence/ \$11 million aggregate are available with a maximum two year policy term. Minimum premiums start at \$2,500. Mold remediation coverage is also available for qualified environmental contractors and consultants.

Eligibility and Submission Requirements

To be eligible for ProStar contractor's pollution or professional liability with general liability, the insured must be an environmental contractor or consultant who:

- Generates at least 50% of revenues from environmental services (70% in NJ and NY)
- Subcontracts less than 50% of their operations
- Has less than \$3 million in revenue
- Non-environmental contractors must have general liability coverage in place with another insurance carrier to get monoline pollution liability coverage

ProStar Online is available to a select group of brokers and agents. Please contact the underwriter responsible for your territory to learn how you can become a ProStar producer.
